

Juniper Gateway 5800 Engineer

Instrumental, Inc. is seeking a Juniper Gateway 5800 qualified engineer interested in a one-year engagement installing and troubleshooting a Juniper 5800 environment. The successful candidate will be focused on deploying and supporting the load-balancing and firewall capabilities of the Juniper Gateway Services 5800 devices.

The ideal candidate will have at least 5 years of industry experience in the following areas:

- Layer 3 configuration, support, and operation
- TCP/IP, bridging, switching, and routing
- Juniper-based Intrusion Detection and Prevention Techniques
- Operating Juniper Networks Routers in the Enterprise
- Architecting and Configuring Juniper Firewalls/IPSec VPN/SSL VPN
- Expertise with the JUNOS language

JNCIE certification a plus. Excellent verbal and customer skills required.

This would be a 1-year contract engagement located near Louisville, KY beginning on or about March 1st 2010.

Qualified applicants may be subject to a security investigation and must meet minimum eligibility requirements for access to classified information. U.S. Citizenship is required.
